Abramovici, F. & Z. Alterman, The motion of a sphere caused by an impulsive force and by an explosive point-source 117
Alexander, S. S. & R. A. Phinney, Diffraction of *P*-waves and the structure of the core–mantle boundary 371
Alterman, Z. & F. Abramovici, The motion of a sphere caused by an impulsive force and by an explosive point-source 117
Anderson, D. L., A seismic equation of state 9
Anderson, D. L., M. N. Toksöz & M. A. Chinnery, Inhomogeneities in the Earth's mantle 31
Archambeau, C. B., E. A. Flinn & D. G. Lambert, Detection, analysis and interpretation of teleseismic signals—compressional phases from the Bilby, Shoal and Fallon events 369
Backus, G. E., Converting vector and tensor equations to scalar equations in spherical coordinates 71
Backus, G. E. & J. F. Gilbert, Numerical applications of a formalism for geophysical inverse problems 247
Bath, J. E. & D. H. Matthews, Formation of magnetic anomaly pattern of Mid-Atlantic Ridge 349

Book Reviews:
——, Methods in geochemistry and geophysics—4. X-ray emission spectrography in geology 461
——, Theory of satellite gravity 462
——, Theory of the Earth's interior 462
——, Proceedings of the First Lunar International Laboratory Symposium. Research in geosciences and astronomy 462
——, Methods in palaeomagnetism 551
Bott, M. H. P., Solution of the linear inverse problem in magnetic interpretation with application to oceanic magnetic anomalies 313
Bullen, K. E., Note on the coefficient μ 459
Caputo, Michele, Linear models of dissipation whose Q is almost frequency independent—II 529
Carpenter, E. W., P. D. Marshall & A. Douglas, The amplitude–distance curve for short-period teleseismic *P*-waves 61
Čermák, Vladimir, Heat flow near Teplice in North Bohemia 547
Červeny, V., The amplitude–distance curves for waves reflected at a plane interface for different frequency ranges 187
Chinnery, M. A., M. N. Toksöz & D. L. Anderson, Inhomogeneities in the Earth's mantle 31

Continental structure:
——, Further evidence for the sialic low-velocity zone in continental areas, M. Landisman, S. Mueller & K. Fuchs 367
——, The teleseismic response for a non-uniform crust, J. Kane & D. Sadeh .. 372
Cook, A. H., The determination of the external gravity field of the Earth from observations of artificial satellites 297

Corrigendum:
——, The intensity of the tertiary geomagnetic field, Peter J. Smith 464
Davies, D., On the problem of compatibility of surface wave data, Q and body wave travel times 421
Douglas, A., E. W. Carpenter & P. D. Marshall, The amplitude–distance curve for short-period teleseismic *P*-waves 63
Doyle, H. A. & A. L. Hales, *P* and *S* travel time anomalies and their interpretation .. 403

Earth—free oscillations of:
——, Spectra of free oscillations from an aftershock sequence, F. Press 219
——, Heat flow near Teplice in North Bohemia, Vladimir Čermák 547

PAGE

Earth—gravity field:
——, The determination of the external gravity field of the Earth from observations of artificial satellites, A. H. Cook 297
——, An automated method of gravity interpretation, J. G. Tanner 339
——, Rapid computation of the gravitational attraction of topography on a spherical Earth, M. Takin & M. Talwani 373
——, The Earth–Mars–Moon system, T. F. Gaskell 545

Earth—physics of the interior
——, A seismic equation of state, D. L. Anderson 9
——, Inhomogeneities in the Earth's mantle, M. N. Toksöz, M. A. Chinnery & D. L. Anderson 31
——, The nature of boundaries within the Upper Mantle as derived from seismic data, M. N. Matveeva 235
——, Nearly symmetric dynamos, J. G. Tough 393
——, A comparison between etched fission track densities on internal and external glass surfaces after neutron irradiation, J. Edwards 541
Edwards, J., A comparison between etched fission track densities on internal and external glass surfaces after neutron irradiation 541
Foldvik, A. & M. G. Wurtele, The computation of the transient gravity wave .. 167
Fuchs, K., M. Landisman & S. Mueller, Further evidence for the sialic low-velocity zone in continental areas 367

Geomagnetism:
——, Solution of the linear inverse problem in magnetic interpretation with application to oceanic magnetic anomalies, M. H. P. Bott 313
——, Spectral analysis of magnetic surveys, G. Gudmundsson 325
——, Formation of magnetic anomaly pattern of Mid-Atlantic Ridge, D. H. Matthews & J. E. Bath 349
——, The solar and luni-solar daily variations of the geomagnetic field at Hartland during the IGY, S. R. C. Malin & B. R. Leaton 359
——, Numerical experiments and the Earth's magnetic field, N. O. Weiss 372
——, Luni–solar daily variations of the geomagnetic field at observatories in the British Isles during the IGY, S. R. C. Malin 397
——, Ancient geomagnetic field intensities—I. Historic and archaeological data: sets H1–H9, Peter J. Smith 417
——, The effect of heat treatment on the magnetic properties of the Old Red Sandstone, A. Stephenson 425
——, Ancient geomagnetic field intensities—II. Geological data: sets G1–G21; historic and archeological data: H10–H13, Peter J. Smith 483
Gerver, M. L. & V. M. Markushevich, On the characteristic properties of travel-time curves 241
